### **Notes:-**

Set away from the road and reached under railway, entrance to works was formerly across Swansea Canal. Formerly part of Morfa Copper Works.

Mid to late 19<sup>th</sup> Century, earlier origins. Tall two storey block along boundary wall with lower one storey and basement stepped ranges attached to inner side. Snecked rubble freestone dressings and rusticated quoins, hipped slate roof (mostly stripped). Moulded cornice and frieze band. Segmental arched heads to lugged window architraves, cill band with moulded brackets (opening blocked), plainer basement. South side of random rubble construction with brick patching. Fine stone doorcase in return facing entrance, ball finial to pediment containing cartouche, swagged capitals to panelled pilasters, arched keyblock doorcase.

Derelict at time of inspection (Spring 1986).
